Summary

Aspiring Software Engineer and B.Tech. Computer Science graduate with hands-on experience delivering live full-stack web applications, Android automation tools, REST API integrations, and database-connected projects. Sole developer of Gurukul Recruitment's production website and creator of Career Copilot and WhatsApp Auto Reply Assistant. Skilled in Java, JavaScript, React.js, Next.js, databases, Git workflows, and AI-assisted development tools.

Technical Skills

Languages: Java, JavaScript, SQL, HTML5, CSS3
Web Development: React.js, Next.js, Responsive UI, Authentication, REST API Integration
Backend & Databases: Java Backend, MySQL, MongoDB, Supabase, Database Integration
Android: Java Android Apps, Background Services, Mobile UI/UX, App Lifecycle Fundamentals
Tools: Git, GitHub, Postman, VS Code, IntelliJ IDEA, Claude Code, Antigravity, AI-Assisted Development
Concepts: OOP, MVC, Debugging, Problem Solving

Experience

Freelance Full Stack Developer Jan. 2025 – Jun. 2025
Gurukul Recruitment Group Remote | gurukuljob.in

- Built and deployed the complete Gurukul Recruitment website from scratch as the sole freelance developer, delivering a live platform for candidate and recruiter workflows.
- Developed responsive pages, navigation flows, forms, and business-facing interfaces using React.js, Next.js, JavaScript, database-backed logic, and REST API integrations.
- Managed client requirements, debugging, Git-based development, and production-ready delivery across the full website lifecycle.

Projects

AI Career Copilot [Java](#) | [Spring Boot](#) | [PostgreSQL](#) | [Redis](#) | [Playwright](#) | [LLMs](#) [Demo](#) | [GitHub](#)

- Built an AI-assisted job-application platform that discovers jobs, matches them to a verified candidate profile, generates tailored resumes and cover letters, and routes approved applications to an automation worker.
- Designed the workflow around job discovery, normalization, deduplication, eligibility filters, vector similarity matching, LLM document generation, groundedness verification, and application-status tracking.
- Built a TypeScript and Playwright automation worker for platform detection and shadow form-filling across Greenhouse, Lever, Ashby, generic forms, and aggregator platforms without accidental final submission.

WhatsApp Auto Reply Assistant [Android](#) | [Java](#) | [Background Services](#) [Demo](#) | [GitHub](#)

- Built a Java-based Android application for automated WhatsApp replies with configurable reply workflows and background-service-based operation.
- Designed mobile UI and workflow logic for setting up reply behavior, supporting reliable background execution, maintainable application flow, and easier debugging.

Internship

AI & Cloud Intern Jul. 2025 – Aug. 2025
IBM SkillsBuild Emerging Technologies Program IBM SkillsBuild | AICTE | Edunet Foundation

- Completed practical training in artificial intelligence, cloud computing, problem solving, and modern software development practices.

Education

JIS University Jul. 2026
B.Tech. in Computer Science & Engineering CGPA: 8.62

Rampurhat High School 2019 – 2021
Higher Secondary, WBCHSE 90.6%

Certifications

NPTEL Programming in Java – Elite HackerRank Problem Solving – Intermediate
